| RESURFACER

£80

Resurfacers are superficial exfoliating treatments, meaning that they work on the stratum corneum layer, the very top layer of the skin. Resurfacers generally have no recovery time and address several concerns and desires through the use of enzymes and acids, which work to refine and exfoliate.

| CHEMICAL PEELS

£120

Chemical peels will also exfoliate and address a wide variety of concerns, yet they have the ability to penetrate beyond the stratum corneum and into the mid to lower sections of the epidermis where resurfacing treatments cannot reach.
